1. Scope of Work

The scope includes:

- **Foam Water Monitor System:** Regular maintenance, inspection, and testing of foam discharge, water flow, and operational functionality.
- **UV Fire Alarm System:** Periodic testing, calibration, and inspection to ensure accuracy and prompt response.
- **Foam Generator System:** Maintenance of foam generator components to ensure functionality and adherence to safety standards.
- **Scheduled Preventive Maintenance:**
 - Routine inspections and functional Testing of all system components.
 - Calibration of detectors, sensors, and foam discharge systems.
 - Cleaning of system components to prevent malfunction.
 - Verification of pressure levels, flow rates, and alarm signals.
- **Corrective Maintenance**
 - Troubleshooting and rectification of faults.
 - Repair or replacement of faulty components with minimal operational disruption.
 - Pre-emptive replacement schedule for aging components.
 - Emergency response for critical system failures within 24 hours.

As per the manufacturer's recommendations, local regulations, and applicable standards.

- **Corrective Maintenance:** Addressing any detected faults promptly to maintain optimal functionality.
- **Emergency Repairs:** On-call services with rapid response to ensure the system remains functional.
- **Software Updates and Upgrades:** Periodically updating software / upgrade to the latest version for optimal performance and compliance.
- **Component Replacement:** Replacement of faulty components with genuine or OEM-approved parts received from PIACL. Any Alteration or Modification will be extra charge from PIACL.
- **Documentation and Reporting:** Maintenance of logs, inspection reports, and certificates for regulatory compliance.

- **User Training:** Training sessions for PIACL staff on the operation of the system, covering emergency procedures, system usage, and troubleshooting.

2. Service Standards

The Contractor shall ensure that all services are performed according to the following standards:

- Compliance with applicable fire safety codes and standards (e.g., NFPA 72, NFPA 11, NFPA-16, NFPA 25, BS 5839, or relevant local codes).
- Use of certified and qualified personnel for maintenance and repairs.
- Maintenance activities must cause minimal disruption to PIACL operations.
- Proper documentation and reporting for all services performed.
- Adherence to Original Equipment Manufacturer (OEM) guidelines for system maintenance.

3. Service Schedule

- **Preventive Maintenance:** To be carried out Monthly, with a detailed report submitted to the Client.
- **Emergency Repairs:** Response time for emergency service requests shall be within 2 hours from the notification.
- **System Testing and Inspection:** Randomly Testing After Maintenance and annually with a full functional test of the system components.
- **Regular Reporting:** Monthly maintenance summary report to be submitted, detailing all services rendered, system condition, and recommendations for any additional work.

4. Key Performance Indicators (KPIs)

The Contractor must adhere to the following KPIs to ensure service quality:

- **Response Time:** Emergency service response within 4 hours.
- **Completion Time:** Non-emergency issues resolved within 48 hours (95% of the time).
- **Preventive Maintenance Completion:** 100% completion as per the agreed schedule.
- **Customer Satisfaction:** Maintain a minimum satisfaction score of 90% based on monthly feedback from PIACL personnel.

5. Penalties and Non-Compliance

In the event of non-compliance with the KPIs:

- **Escalation Procedures:** Persistent failure over three consecutive months may lead to escalation, potential penalty increase, and contract review.
- **Termination Clause for Severe Non-Compliance:** Immediate termination if non-compliance poses a risk to life safety or operational integrity.

6. Contractor Obligations
