(a) 2% of the quoted value subject to maximum ceiling of Rs. 0.500 Million.

# REGISTERED / PRE-QUALIFIED BUT UNINDEXED FIRMS.

(b) 3% of the quoted value subject to maximum ceiling of Rs. 0.750 Million.

# UN-REGISTERED / NOT PRE-QUALIFIED / UNINDEXED FIRMS.

(c) 5% of the quoted value subject to maximum ceiling of Rs. 1.000 Million.

## 14. Return of Earnest Money:

- (a) Earnest money to the unsuccessful bidders will be returned on finalization of the contract.
- (b) Earnest money of the firm/firms with whom contract is concluded will be returned on submission of Bank Guarantee and its acceptance by CMA (DP).

## Special Note.

- All Participating firms must submit technical offers in duplicate (one for TSR committee and one for DP (Navy) record).
- Unregistered (Not registered with Directorate General Defense Purchase)
   firms must provide the documentary evidence of their technical and financial capability to undertake the project.

- c. Unregistered firms are to submit a certificate along with their Technical offer stating that the firm is not black listed by any government organization and not under disciplinary trial or embargo. Acceptance of firm's offer, firms not registered with DGDP is subject to security clearance. All firms who do not provide requisite documentary or security wise not cleared by DGDP (FS Team) will be rejected.
- d. In case of Pakistani firms, sales tax, NTN and income tax registration certificates are to be attached with the offer. These certificates are mandatory with the BID, otherwise offer shall be REJECTED.
- Company registration certificates are to be attached with offer.
- f. Requisite amount of earnest money (in shape of Bank Draft in the favour of CMA (DP)) is to be attached in separate envelop in sealed condition with the Technical offer. Photocopy of the same shall also be attached with DP-2 as a testimony. Cheques/crossed cheques shall not be accepted.
- g. Duly completed Form DP-1 and DP-3 are to be attached with Technical Offer in duplicate.
- h. DP-2 Form shall also be submitted with Technical Offer without mentioning of prices. Moreover, compliance or otherwise against each para/requirement of Annex A & B duly signed & stamped by firm authorized rep is to provided for technical scrutiny.
- j. Only registered supplier on Active Taxpayers List (ATL) of FBR are eligible to participate in the Tender and submit quote.
- k. Release of payments is subject to mandatory submission of Filer Certificate duly issued by FBR showing the name of supplier on Active Taxpayers List (ATL). No payment will be released by CMA (DP) unless latest Filer Certificate duly issued by FBR showing the name of supplier on its Active Taxpayer list is submitted alongwith payment documents.

Note: In case of failure to comply above instructions, Terms and conditions, offer will liable for rejection.

## TECHNICAL SPECIFICATIONS

This international standard was developed in accordance with internationally recognized principles on standardisation actabilities in the Decision on Principles for the Development of International Standards, Guides and Recommendation beared by the World Trede Organization Technical Sarriers in Trade (TBT) Committee.

Designation: C150/C150M - 18

## Standard Specification for Portland Cement<sup>1</sup>

This smorted is issued under the fixed designation C150/C150M; the number immediately following the designation indicates the year of ariginal adoption or, in the name of revision, the year of last respected. A number in premittees indicates the year of last respected. A number in premittees indicates an editorial change since the last revision or reapproval.

#### L. Scope\*

- 1.1 This specification covers ten types of portland cement, as follows (see Note 2):
- 1.1.1 Type I—For use when the special properties specified for any other type are not required.
- 1.1.2 Type (A-Air-entraining coment for the same uses as Type I, where air-entrainment is desired.
- 1.1.3 Type II—For general use, more especially when modcrate sulfate resistance is desired.
- 1.1.4 Type IIA—Air-entraining cement for the same uses as Type II, where air-entrainment is desired.
- 1.1.5 Type II(MH)—For general use, more especially when moderate heat of hydration and moderate sulfate resistance are desired.
- 1.1.6 Type IRMH)A—Air-entraining cement for the same uses as Type II(MH), where air-entrainment is desired.
- 1.1.7 Type III—For usu when high early strength is desired.
  1.1.8 Type IIIA—Air-entraining cement for the same use as
- Type III, where air-entrainment is desired.

  1.1.9 Type IV—For use when a low heat of hydration is thesired.
- 1.1 to Type V-For use when high sulfate resistance is desired.

Now 1—Some cements are designated with a combined type uncestiveness, such as Type I/II, indicating that the cement meets the requirements of the indicated types and is being offered as ruitable for use when either type is desired.

- Note 2 Centert system occasion.

  Note 2 Centert conforming to the requirements for all types are not carried in stock in some areas. In advance of specifying the use of coment other short Type 1, determine whether the proposed type of roment is, or I an be made, available.
- 1.2 The values stated in either SI units or inch-pound units are to be regarded separately as standard. The values stated in each system may not be exact equivalents; therefore, each system shall be used independently of the other. Combining values from the two systems may result in non-conformance with the standard. Values in SI units [or inch-pound units] shall be contained by measurement in SI units [or inch-pound units].

or by appropriate conversion, using the Rules for Conversion and Rounding given in IEEE/ASTM SI 10, of measurements made in other units [or SI units]. Values are stated in only SI units when inch-pound units are not used in practice.

- 1.3 The text of this standard references notes and footnesses which provide explanatory material. These notes and footnesses (excluding those in tables and figures) shall not be considered as requirements of the standard.
- 1.4 This international standard was developed in accordance with internationally recognized principles on standardisation established in the Decision on Principles for the Development of International Standards, Guides and Recommendations issued by the World Trade Organization Technical Barriers to Trade (TBT) Committee.

## 3. Terminology

3.1 Definitions-See Terminology C219.

## 4. Ordering Information

4.1 Orders for material under this specification shall include the following:

4.1.1 This specification number and date,

4.1.2 Type or types allowable. If no type is specified, Type I shall be supplied,

4.1.3 Any optional chemical requirements from Table desired, and

4.1.4 Any optional physical requirements from Table 4, if desired.

## 5. Ingredients

5.1 The cement covered by this specification shall contain no ingredients except as follows:

5.1.1 Portland cement clinker.

5.1.2 Vinter or calcium sulfate, or both. The amounts shall be such that the limits shown in Table 1 for sulfur trioxide and loss-on-ignition are not exceeded.

5.1.3 Limestone. The amount shall not be more than 5.0 3 by mass such that the chemical and physical requirements of this standard are met (see Note 3). The limestone, defined in Terminology C51, shall be naturally occurring and consist of at least 70 % by mass of one or more of the mineral forms of calcium carbonate. If limestone is used, the manufacturer shall report the amount used, expressed us a percentage of cement mass, as determined using Annex A2, along with the oxide composition of the limestone.

Norm 3-This standard permits portland concert to contain linestone. but does not require that limestone be an ingredient in the sement. Cement without ground limextone can be specified in the contract or order.

5.1.4 Liorganic processing additions. The amount shall be not more than 5.0 % by mass of cement. Not more than one inorganic processing addition shall be used at a time. For amounts greater than 1.0 %, they shall have been shown to meet the requirements of Specification C465 for the inorganic processing addition in the amount used or greater. If an inorganic processing addition is used, the manufacturer shall

## Standard Specification for Portland Cement<sup>1</sup>

This standard is issued under the fixed designation C15GC150M; the number immediately following the designation irelicates the year of last revision. A number in percentages indicates the year of last responsed. A superscript epsilon (e) indicates an editorial change since the last revision or reapproved.

#### 1. Scope\*

- 1.1 This specification covers ten types of pontand cement, as follows (see Note 2):
- 1.1.1 Type I-For use when the special properties specified for any other type are not required.
- 1.1.2 Type IA—Air-entraining cement for the rame uses as Type I, where air-entrainment is desired.
- 1.1.3 Type II--For general use, more especially when moderate sulfate resistance is desired.
- 1.1.4 Type IIA—Air-entraining cement for the same uses as Type II, where air-entrainment is desired.
- 1.1.5 Type II(MH)—For general use, more especially when moderate heat of hydration and moderate sulfate resistance are desired.
- 1.1.6 Type II(MH)A—Air-entraining cement for the same uses as Type II(MH), where air-entrainment is desired.
- 1.1.7 Type III-For use when high early strength is desired.
- 1.1.8 Type IIIA—Air-entraining cernest for the same use as Type III, where air-entrainment is desired.
- 1.1.9 Type IV-For use when a low heat of hydration is desired.
- 1.1.10 Type V -- For use when high sulfate resistance is desired.

Note 1—Some concets are designated with a combined type classification, such as Type I/II, indicating that the comput meets the requirements of the indicated types and is being offered as suitable for use when either type is desired.

Note 2—Cernent conforming to the requirements for all types are outcarried in stock to some areas. In advance of specifying the use of extrema other than Type I, determine whether the proposed type of cernent to, or can be made, available.

1.2 The values stated in either SI units or inch-pound units are to be regarded separately as standard. The values stated in each system may not be exact equivalents; therefore, each system shall be used independently of the other. Combining values from the two systems may result in non-canformence with the standard. Values in SI units for inch-pounc units shall be obtained by measurement in SI units for inch-pound units!

or by appropriate conversion, using the Rules for Conversion and Rounding given in IREE/ANTM SI 10, of measurements made in other units [or SI units]. Values are stated in only SI units when inch-pound units are not used in practice.

- 1.3 The text of this standard references notes and footnotes which provide explanatory material. These notes and footnotes (excluding those in tables and figures) shall not be considered as requirements of the standard.
- 1.4 This international standard was developed in access cance with internationally recognized principles on standard ization established in the Decision on Principles for the Development of International Standards, Galdes and Recommendations issued by the World Trade Organization Technical Barriers to Teade (TBT) Committee.

Notes 6—There are cases where performance of a cement is improved with SO<sub>2</sub> in excess of the Table 1 limits in this specification. Guide Chil is one of several methods a manufacturer can use to evaluate the effect of sulfate content on cement characteristics. Whenever SO<sub>3</sub> content of a cement exceeds Table 1 limits, Test Method C1038 results provide evidence that excessive expansion does not occur at this higher suifate content.

#### 7. Physical Properties

7.1 Portland cement of each of the ten types shown in Section I shall conform to the respective standard physical requirements prescribed in Table 3. In addition, optional physical requirements are shown in Table 4.

#### 8. Sampling

- 8.1 When the purchaser desires that the cement be sumpled and tested to verify compliance with this specification, perform sampling and testing in accordance with Practice C183.
- 8.2 Practice C183 is not designed for manufacturing quality control and is not required for manufacturer's certification.

#### 9. Test Methods

- 9.1 Determine the applicable properties enumerated in this specification in accordance with the following test methods:
- 9.1.1 Chemical Analysis-Test Methods C114.
- 9.1.2 Air Content of Mortar-Test Method C185
- 9.1.3 Fineness by Air Permeability-Test Method C204

#### 10. Li spection

10.1 Inspection of the material shall be made as agreed upon between the purchaser and the seller as part of the purchase

#### II. Rejection

- 11.1 The cement shall be rejected if it fails to meet any of the requirements of this specification.
- 11.2 At the option of the purchaser, retest, before usua, comera remaining in bulk storage for more than six months in cament in bags in local storage in the custody of a vendor to more from three months after completion of tests and reject the cement if it fails to conform to any of the requirements of this specification. Cement so rejected shall be the responsibility of the owner of record at the time of resampling for retest.
- 11.3 Puckages shall identify the mass contained as moweight. At the option of the purchaser, packages more than 2 below the mass marked thereon shall be rejected and it finaverage mass of packages in any shipment, as shown to determining the mass of 50 packages relected at random, in icthan that marked on the puckages, the entire shipment shall to rejected.

## 12, Manufacturer's Statement

12.) At the request of the purchaser, the manuscripter state in writing the nature, amount, and identity of

an entraining addition and of any processing addition used: and also, if requested, shall supply test data showing compliance of such air-entraining addition with Specification U226. and of such processing addition with Specification C- 65.

12.2 When Impestone is used, the manufacturer shall state in wining the amount thereof and, if requested by the parchaser, steal supply comparative test data on chemical and physical properties of the cement with and without the limestone (see 1. The comparative tests do not supersede the normal restring to confirm that the cement meets chemical and physical requirements of this standard. The amount of limestone in cement shall be determined in accordance with Anne A2

Note: 7- Communities test than may be from qualification tests per-cented by the monofocutor desire formulation of the cement with

Non-8-Chlorides in concrete come from multiple ingredients and rewent chloride content may be required to estimate concrete chloride concent. Requirements for concrete eldoride content are provided in holding codes and other documents.

#### 13. Packaging and Package Marking

13.1 When the cement is delivered in packages, the words "Portland Cement," the type of cement, the name and brand of the manufacturer, and the mass of the cement contained therein shall be plainly marked on each package. When the cement is an air-entraining type, the words "air-entraining" shall be plainly marked on each package. Similar information shall be provided in the shipping documents accompanying the shipment of packaged or bulk cement. All packages shall be in good condition at the time of inspection.

Norse 9-With the change to \$3 units, it is desirable as establish a standard SI peckage for portland cemeus. To that end 42 kg [92.6 lb] provides a convenient, even-numbered mass reasonably similar to the traditional 94-lb 142 6-kgl package

#### 14. Storage

14.1 The cement shall be stored in such a manner as in permit easy access for proper inspection and identification of each shipment, and in a suitable weather-tight building that will protect the cement from dampness and minimize warehouse set.

#### 15. Manufacturer's Certification

15.1 Upon request of the purchaser in the contract or order. manufacturer's report shall be furnished at the time of shipment stating the results of tests made on samples of the material taken during production or transfer and certifying that the cement conforms to applicable requirements of this specifigation.

None 10-Guidance on perparing the manufacturer's report is provided in Appendix XI.

#### ANNEXES

(Mandatory Information)

#### AL CALCULATION OF POTENTIAL CEMENT PHASE COMPOSITION

A1.1 All values calculated as described in this punex shall be counded according to Practice E29. When evaluating conformance to a specification, round values to the same number of places as the corresponding table entry before making comparisons. The expressing of chemical funtations by means of calculated assumed phases does not nocessarily mean that the oxides are actually or entirely present as such Philades.

A1.2 When expressing phases, C = CaO, S = SiO,  $A = Al_2O_4$ ,  $F = Fe_2O_4$ . For example,  $C_3A = 3CaO_4Al_2O_4$ . To taniam dioxide and phosphorus pentoxide (TiO, and inOa) shall not be included with the Al<sub>2</sub>O<sub>3</sub> content. See Note 51.1.

New Al-1-When comparing exide analyses and enleutated places hom different sources or from different historic times, he aware that they may not have been reported on exactly the same basis. Chemical data obtained by Reference and Alternate Test Methods of Test Methods (+1) (we) checkstry) may include titania and phosphorus as alumina indees proper correction has been made (see Test Methods C114), while state ontinued by rapid instrumental methods usually do not. This can result in small differences in the executated phases. Such differences are wouldly within the preciation of the analytical methods, even when the methods are properly qualified under the requirements of Test Methods (11)

A1.3 When the ratio of percentages of aluminum excleferric oxide is 0.64 or more, the percentages of tricalcions silicate, dicalcium silicate, tricalcium aluminate, and 'expentcium aluminoferrite shall be calculated from the chemical analysis as follows:

> Tricaldium siticate (C<sub>2</sub>S) = (4.071 × % CeO) = (7.600 × % SiO<sub>6</sub>) - (A.718 × % AL/O<sub>3</sub>) - (1.430 × % Fe,O<sub>3</sub>) - (2.852 × % SO<sub>3</sub>)

## 4 COMPENSATION ON BRECH OF CONTRACT

If the contractor fails to supply the contracted stores/equipment or contract is cancelled either on Supplier's Risk & Expense (RE) or without RE or contract becomes ineffective due to default of Supplier or stores/equipment declared defective and causes loss to the Purchaser. Supplier shall be liable to pay to the Purchaser a compensation for loss or inconvenience resulting for his default/defect or from the rescission of this contract. When such default/defect or rescission take place such compensation shall be in excess to the RE amount, if imposed by the competent authority. Compensation amount in terms of money shall be decided by the purchase officer and shall be deposited by Supplier in Government of Pakistan treasury in the currency of contract.

## 5 SECRECY

- a. The contractor shall undertake that any information about the sale/purchase of the stores under this contract shall not be communicated to any person, other than the manufacturer of the stores, or to any press or agency not authorized by DP(N) to receive it. Any breach on this account shall be punishable under the Official Secret Act- 1923 in addition to termination of the contract at the risk of Supplier.
- In this regard Non Disclosure Agreement (NDA) as per format at Appendix II is to be signed by the firm at the time of signing of contract.

## 6 COURT OF JURISDICTION

All disputes arising in connection with this contract shall be sorted out through mutual discussion. Unsettled issues may however be dealt with under the Laws of Pakistan. The Courts at Islamabad shall be the Court of Jurisdiction for any dispute relating to this contract for adjudication.

## 7 ARBITRATION

Parties shall make their attempt that all disputes arising under this contract shall be settled through discussions in good faith. In the event that either party shall perceive such discussion to be making insufficient progress towards settlement of dispute(s) at any time, then such party may be written notice to the other party to refer the dispute(s) to final and binding arbitration as provided below:

- The dispute shall be referred to Secy (DP) for his decision.
- The venue of arbitration shall be the place as the purchaser at his discretion may determine;
- Decision of Secy (DP) shall be final and binding on both the parties.
- In the course of arbitration, the contract shall be continuously be executed except that part which is under arbitration.
- All proceedings under this clause shall be conducted in English language and in writing.

#### 8 DISCREPANCY

In case of any discrepancy found in the supplies, the consignee shall render a discrepancy report upon receipt of the stores. The quantities found short/unserviceable shall be made good by the supplier without any additional cost 07 days.

## 9 INDEMNITY

The contractor shall at all times indemnify the Purchaser against all claims which may be made in respect of the stores for infringement of any rights protected by Patent, Registration of Design or Trade Mark and shall take all risks of accidents or damages which may cause a failure of the supply from whatever cause arising and the entire responsibility for the sufficiency of all the means used by him for the fulfillment of the contract provided always that in the event of any claim in respect of alleged breach of Patent, Registered Design or Trade Mark being made against the Purchaser, the Purchaser shall notify the Supplier of the same and the Supplier shall be at liberty to settle any dispute or to conduct any litigation that may arise there from at his own expenses.

#### 10 SUBLETTING

The Supplier shall be entirely responsible for the execution of the contract in all respects according to the terms of the contract. The Supplier shall not sublet, transfer or assign the contract or any part thereof to any other firm/party without prior written permission of the Purchaser.

## 11 WARRANTY/GUARANTEE

- Supplier is to guarantee that store is as per specification of the contract.
- b. In case of supplier's failure to replace the defective stores without any additional cost within 30 days he will refund relevant cost in the currency in which received along with a reasonable compensation as claimed by PN.
- The supplier is to guarantee that materials used, whether or not of his manufacture, conform to the international quality standards i.e. ASTM.
- d. The warranty will remain valid for 06 months on clearance of inspection of stores by the consignee.

## 12 PERFORMANCE BANK GAURANTEE

To ensure timely and correct supply of stores, the firm will furnish an unconditional Performance Bank Guarantee, upon signing of the contract from a scheduled bank of Pakistan for an amount equal to 10% of the total FCA (Final Contract Amount) value of the contact (on a Judicial Stamp Paper) of appropriate value as per prescribed format

## 13 DOCUMENTATION

 Supplier is to provide following documentation at the time of inspection.

- (1) Firm's Warranty/Guarantee on form "DPL-15" for functionality/serviceability of the item(s).
- (2). Test certificate issued by third party lab as per ASTM C150/C150M-18
- Photocopies of documentation will not be accepted.

## 14 ADDITIONAL INSTRUCTIONS

## Certificate of Conformance by OEM

a. Firm shall provide correct and valid e-mail and Fax No to HQ DW & CE (Navy) and DP (N). Contracting firm shall provide OEM conformance Certificate to HQ DW & CE (Navy) or it is to be e-mailed to HQ DW & CE (Navy) under intimation to DP (N). Hard copy of COC must follow in any case through courier. On receipt, HQ DW & CE (Navy) shall approach the OEM for verification of conformance certificate issued by the OEM. Companies / firms tendering false OEM conformance certificates will be black listed.

OEM's CoC must have following information:

- (1). Part/Pattern No. Of equipment.
- (2). Date/Period of manufacturing.
- S.No of batch No/Lot No should be embossed engraved on the equipment.
- OEM test certificate/FSTs /Certification/approval.
- (5) Description of store along with Quantity.
- Manufacture Identification (Name Address and contract No).
- Details of third party testing authority (if their services used.
- List of safely / Regulatory standards / specification quoted in the contract.
- Conformance to standard / specification quoted in the contract.
- b. Packing of stores, where applicable should be of international quality standards to be worthy of air, sea, rail and road transportation.

#### Inspection

- c. Prior delivery of contracted stores, the firm/supplier will ensure testing of the same through third party lab as per ASTM C150/C150M-18, at her own expense.
- Inspection with regard to quantity, weight and documentation pertaining to certification will be carried out at firm's premises prior delivery of stores
- e. Inspection Authority: CMES (NAVY) ORMARA.
- f. Inspection Officer: Any Officer deputed by CMES (N) ORMARA.
- g. The inspection Officer will be informed  $\underline{03}$  working days in advance of the time and place where the goods will be ready for inspection.

h. Upon clearance of inspection at firm's premises, the inspection Officer and supplier's rep will sign the joint inspection Performa.

### Checking of Stores at Consignee's End

I. All stores will be checked at consignee's end in the presence of supplier's representative. If for the reasons of economy or any other reason, the supplier decided not to nominate his representative for such checking, an advance written notice to this effect will be given by the supplier to the consignee prior to or immediately on shipment of stores. In such an event, the supplier will clearly undertake that the decision of consignee with regard to quantities and description of consignment will be taken as final and discrepancy found will be accordingly made up by supplier. Consignee's report on checking of store will be binding on the supplier in such cases.

## 15 ACCEPTANCE/ INSPECTION CRITERIA

The final acceptance certificate will be signed by CMES (N) ORMARA within 01 week, only after conformity of ASTM standards of all stores.

## 16 PRICE VARIATION

Prices offered will be firm and final.

## 17 RISK PURCHASE

In the event of failure on the part of supplier with the contractual obligations, the contract is liable to be cancelled at the risk and expense of the supplier in accordance with DPP & I-35 (Revised-2023). The purchaser shall be entitled to receive back all advance payments made by him and will have the right to purchase the stores of similar or equivalent specification from elsewhere. In such a case the price difference (if any over and above the Net value of the contract) shall be paid by the firm, i.e. Risk & Expense amount.

## 18 LIQUIDATED DAMAGES

Liquidated Damages upto 2% but not less than 01% per month or a part of month are liable to be imposed on the suppliers by the purchaser in accordance with DPP&I-35 (Revised 2023), if the stores/services supplied after the expiry of the delivery date without any valid reasons. Total value of LD shall not exceed 10% of the contract value of store delivered late.

## 19 FORCE MAJEURE

a. The Parties will not be held responsible for any non-fulfilment or delay in carrying out the contractual obligations due to an event of Force Majeure such as acts of God (earthquake, flood, fire, typhoon, hurricane, mass epidemic diseases), War (military actions, subversive activities or sabotages), riots, civil commotion, strike, lockouts, prohibitive measures of government (prohibition of trade relations with certain countries as a result of UN sanctions etc) directly affecting the parties and any event or circumstances on which the parties has no control.

b. To be deemed force-majeure, the said events should be of

Li:

extraordinary, unpredictable and unavoidable nature, and occur after the contract comes into force and be beyond the control of the Parties

- c. Should be force-majeure circumstances occur, the suffering party must notify in writing the other party within 30 (thirty) days from occurrence thereof. The notice should contain information about the nature of the circumstances and, if possible, an evaluation or estimate of their probable impact upon performance of obligations under the contract, as well as the time required for such performance.
- d. Upon termination of the above-mentioned circumstances, the suffered party should promptly give a relevant written notice to the other party. The notice should specify the time within which performance of obligations under the contract is being suggested.
- e. Within reasonable time, the party exposed to force-majeure should transfer to the other party a certificate issued by the legal authorities as evidence of occurrence of the force-majeure situation.
- f. Should the force-majeure situation occur, the timing of performance by the parties of their respective obligations under the contract shall be extended adequately by adding on the duration of such circumstances and consequences thereof.
- g. Should the force-majeure circumstances continue for more than consecutive 60 (sixty) days, the parties shall negotiate and coordinate appropriate measures needed to perform their respective obligations under the contract. If duration of such circumstances exceeds 6 (six) months and the parties fail to agree on further coordinated measures to perform their respective obligations, the Contracting Party (Purchaser) shall have the right to terminate the contract, whether partially or wholly, free of any subsequent claims, by sending a written termination notice to the other party (Seller).
- h. The Purchaser may not claim LD in relation to delays in delivery, provided that such delays have been caused by occurrence of a force-majeure event.
- Delay in obtaining the export licenses, permits, and/or thirdparty certificate may not be counted as Force Majeure.

#### 20 TERMINATION

- a. If at any time during the currency of the contract the purchaser decides to terminate the contract for any reason whatsoever (other than for reasons of non-Delivery) he shall have right to do so by giving the supplier a registered notice to that effect. In that event the purchaser will accept delivery at the contract price and terms of such stores/goods/services which are in the actual process of manufacturer that is completed and ready for delivery within thirty days after receipt by the supplier of such notice.
- For reminder of the undelivered stores/ goods/ services the purchaser may elect either:
  - (1) To have any part thereof completed and take the

- delivery thereof at the contract price or.
- (2) To cancel the remaining quantity and pay to the supplier for the articles or sub-components or raw materials purchased by the supplier that are in the actual process of manufacturer at the price to be determined by the purchaser. In such a case materials in the process of manufacture shall be delivered by the supplier to the purchaser.
- (3) No payment shall however be made for any materials not yet in the actual process of manufacture on the date notice of cancellation is received.
- c.
